The Sewerage disposal plant was built in 1942 of permanent construction type at a cost of \$14,000. The facility consisted of a small solid waste separator building, pump house, a circular clarifier, aerator and digester. The solid waste separator has dimensions of 17 feet - 6 inches by 10 feet. The building has a concrete foundation, concrete floor, wood walls and an asphalt roll roof. The pump house, which is 20 feet - 6 inches by 12 feet - 6 inches has wood walls, concrete foundation and concrete floor. The aerator and clarifier are 26 feet in diameter and were constructed of concrete. The digester is 24 feet - 6 inches in diameter and is also concrete. the facility also included a 7 feet by 12 feet concrete structure providing for outflow.
